

Overview of practitioner benefits.

Why do you, the physician, need DMEevalumate.com?

In order for your patients to receive the durable medical equipment that they need from Medicare, you must perform a face-to-face evaluation with them to accurately establish medical justification and document it in an acceptable Medicare format. With constant changes to Medicare requirements and extremely busy schedules, it is very difficult to keep up with current standards.

What is DMEevalumate.com?

DMEevalumate is a HIPAA compliant online program used during patient face-to-face evaluations to produce accurate Medicare paperwork documenting the DME medical necessity. The program is frequently updated to reflect the most current Medicare Coverage Criteria.

How does it work?

Algorithms within the DMEevalumate program compare your answers on the questionnaire to the current Medicare coverage criteria. It determines the correct DME for each patient and generates complete, accurate and acceptable documentation for that equipment.

Why should you use DMEevalumate.com?

- 1) It generates correct and complete DME paperwork that is acceptable to Medicare.
- 2) It saves on labor costs; your staff no longer has to spend time with DME providers while they work with Medicare to resolve paperwork issues.
- 3) For power mobility, the program tells you immediately what PMD the patient qualifies for, completely eliminating any guesswork.
- 4) It produces documentation that is compatible with all Electronic Medical Records and is printable.
- 5) It's easy to learn, easy to use and quickly assures that you ask all pertinent Medicare questions.
- 6) It's free for practitioners.
